ABOUT ME

A motivated second-year undergraduate with strong problem-solving, teamwork, and communication skills, eager to learn and contribute to real-world projects while continuously growing both technically and professionally, passionate about exploring different areas of Computer Science.

EDUCATION

GURU JAMBHESHWAR UNIVERSITY OF SCIENCE AND TECHNOLOGY, HISAR

2024–2028

BTech Computer Science and Engineering (AI/ML)
SGPA – 8.5

SKILL

TECHNICAL SKILLS

- Python/C++/Java/JavaScript/R
- Data Structures and Algorithm
- Git/Github
- MERN
- Artificial Intelligence and Machine Learning

NON – TECHNICAL SKILLS

- Problem Solving
- Team Work & collaboration
- Leadership
- Time Management
- Communication skills

FEATURED

- Solved 200+ Problems on LC
- Pupil on Codeforces
- Atcoder (Brown)
- CodeChef (2 Stars)

WORK EXPERIENCE

Open Source Contributor — Sugar Labs / AOSSIE

JAN 2026 – Present

- Contributed to open-source projects (MusicBlocks, Sugar, Resonate) as part of GSoC preparation
- Analyzed and navigated complex codebases to identify bugs and enhancements
- Submitted pull requests and actively participated in code reviews and discussions
- Improved understanding of collaborative development using Git and GitHub workflows
- Built practical experience in debugging, feature implementation, and version control

SuperManager AGI – Python Developer

MAR 2025 – AUG 2025

- Developed and managed JSON-based payloads for backend integration of AGI systems
- Worked on agentic workflow design to improve task execution and system coordination
- Collaborated with cross-functional teams to support feature development and system improvements
- Contributed to backend logic and data handling for AI-driven processes

SuperManager AGI – Software Test Engineer

SEP 2024 – MAR 2025

- Designed and executed test cases to evaluate AGI performance using diverse prompts
- Maintained test reports in MS Excel for effective bug tracking and resolution
- Documented and reproduced issues, collaborating with the technical team for fixes
- Performed prompt-based testing to assess AI accuracy and consistency
- Supported B2B outreach via LinkedIn and Gmail

PROJECTS

- DWAOP (MERN)** – Built a workflow-based system for managing departmental processes with real-time tracking and role-based access
- Billing System (Python)** – Built a restaurant billing system with automated invoice and order management
- Dino Run Game (C++ / SFML)** – Developed a 2D game with collision detection and basic game mechanics
- GramDarpan (SIH Project)** – Built a web solution for a Smart India Hackathon problem statement
- Movie Review Analyzer (Deep Learning)** – Created a sentiment analysis model using CNN and RNN
- CityMitra (Mobile App)** – Developed a mobile app for city-level services and user interaction
